

Die Storage Solution

Required –

- Various patterned papers and stickers from the December Club Kit.
- Brown ink pad and blending tool
- Kaisercraft 2 ring binder
- Kaisercraft resealable pockets.

Instructions –

- Cut card to fit on the front of the album with approximately $\frac{3}{4}$ centimetres of folder cover left uncovered. Cut strips of patterned paper to use for decorating the front of the folder.
- Cut patterned paper pieces to cover the side and back of the folder. Ink the edges with the blending tool and adhere in place.
- Decorate the front of the folder as desired – all pieces used to decorate mine have come from the kit.

- Inside the album, insert the resealable pockets into the binder arms. I then use each of these ziplock pockets to safely store each of my nestabilities sets. This way I know they are safe and protected while they are also in the sets I purchased them as.
